ABSTRACT

Four appendices are provided to the Market Research Task Force Report completed at Vancouver Community College (VCC). Appendix I describes, on a series of matrices, the programs offered at each of the three VCC campuses and in the college's continuing education department. The following information is included on the matrices for each college program: British Columbia Post-Secondary Discipline Classification, funding status, enrollment criteria, full- and/or part-time student participation, number of initial registrants in Fall 1978, and the number of program completions. Appendix II presents headcount enrollments by age and sex for the years 1975 through 1978 for the academic, career/technical, college foundation, and vocational program areas. Appendix III details regional, subregional, and program participation data for 1976 and 1978 and then provides participation projections for 1981 through 1986. Appendix IV presents the results of a Fall 1978 survey of 55 data tables. The survey focused on student characteristics, including residence, educational background, demographic profiles, and employment and educational goals. Maps and sample questionnaires are included. Each appendix includes a discussion of the data collection and computation methodologies used. (JP)

APPENDIX I: Report Section B4

"Program Matrix"

Principal Problems Encountered in Preparation of the Program Matrix

1. Lack of clarity of purpose and hence what information should be included in the program matrix.

2. Time required to gain efficient familiarity with Vancouver Community College programs so that one can compile a program matrix for the entire College.

3. Accommodating variations in programs across the College campuses, both between and within given centres. Often there were unique characteristics which created the problems, because it is difficult to make definitions and the data collected under specific headings were not exactly comparable, for example:

   a) the proportion of students who will apply for a Certificate or Diploma on completion of a program varies greatly; low for Arts & Science, Langara, and high for the Business Programs at Continuing Education, Eric Hamber.

   b) the meaning of "completion" in some upgrading programs at Vancouver Vocational Institute is difficult to define because the required upgrading can vary from a few days to months.

   c) identification of "students in a program" differs:

      - some students apply for admission to a specific program (i.e. Nursing, Langara).

- some students are identified with a particular program only after all the requirements have been fulfilled (i.e. specific business certificates at King Edward Campus, Eric Hamber).
- in one program, students may complete the requirements or obtain a Diploma either by being admitted formally to the program before instruction commences, or, by completing the program requirements without having undergone formal admission (i.e. Accounting, Langara).

4. Lack of comparable data on program or subject area for registrant entry and completion owing to the nature of record keeping. Basically, there is a difference between computer recording of data at Langara and King Edward Campus (for College Foundations and Music), and manual tabulation which is done at other centres. The manual tabulation of data for Vancouver Vocational Institute, for example, must be considered approximate information.

5. Compilation of a program and subject area listings was complicated by:

   a) difficulties in identifying programs, particularly in Continuing Education.

   b) programs terminating and starting.

Key Personnel Contacted in Preparation of the Program Matrix

Continuing Education	Eric Hamber, Keith Muir. Administrator; program organization and registrants.
	Langara, Lawrence Fast, Administrative Assistant; program organization and registrants.

	Vancouver Vocational Institute, Wally Lidster, Administrative Assistant; program organization.
	Beth Stuart, Clerk; registrants.
King Edward Campus	Doug Brown, Dean of Administration & Student Services; program organization.
	Shirley Girvan, Student Records; program organization and registrants.
	Jim Chivas, Computer Centre, Langara; print out "Distribution of Letter Grades by Subject Area and Location" for College Foundations and Music.
Langara	Jock Denholm, Principal; overview of programs for Langara and other centres and identification documents and personnel.
	Gerry Sylvester, Dean of Instruction; overview of programs.
	Ralph Kerr, Assistant Dean, Career Programs; Career/Vocational program organization.
	Don Collier, Scheduling Officer; program and subject area registrants with part of this information from print out "Statistics Registration/Sections/Faculty".
	Suzanne Stevens, Department Head, Community Services; program organization.
	Valerie Nielsen, Registrar; program completions.
	Jim Chivas, Computer Centre; print out "Distribution of Letter Grades by Subject Area and Location" for College Foundations and Music.
Vancouver Vocational Institute	Art Griffiths, Division Chairman, Technical Programs; program organization.
	Jim Mitchell, Division Chairman, Business & Health Programs; program organization.
	Tony Wood, Division Chairman, Service Programs; program organization.
	Joyce Little, Student Records; program registrants.

Suggested Sequence for Preparation of the Program Matrix

1. Preparation of a clear statement of purpose for which the matrix is to be prepared.

2. Determination of precise information to be collected including:

   a) the basis of organization of the matrix (Post-Secondary Discipline Classiciation, or other).

   b) the definition of terms used in column headings.

   To achieve the foregoing requires input from administrative personnel from <u>all</u> campuses who are aware of the nature of Programs, Financing, and Student Records pertaining to programs.

3. Determination of the key personnel at each campus who are able to supply the information:

   a) the organization of programs (often Division and Department Heads are the best contacts).

   b) the numbers of students participating in programs (involvement of such as personnel in charge of Student Records, Scheduling Officer, Registrar, etc.).

4. Trial run of matrix to cover <u>all</u> College campuses and types of programs:

King Edward	- College Foundations, English Language Training and selected others.
Langara	- Academic and Career/Vocational.
Vancouver Vocational Institute	- Business Programs and selected programs from other departments.
Continuing Education	- Business and selected others.

5. Preparation and re-checking of a comprehensive list of programs and subject areas:

King Edward	- Dean of Administrative & Student Services.
Langara	- Academic - Dean of Instruction Career - Assistant Dean, Career Programs Department Heads.
Vancouver Vocational Institute	- Division Heads.
Continuing Education	- Administrators at each Centre.

6. Compilation of matrix:

   a) General program and subject area characteristics to be obtained from personnel list in No. 5 above.

   b) Records of student intake and completion:

King Edward	- Student Records.
Langara	- Registrar & Scheduling Officer.
Vancouver Vocational Institute	- Student Records.
Continuing Education	- From or through Administrators at each campus.

   The information obtained from personnel in charge of Student Records may need to be assessed by more senior administrative personnel.

7. On completion, the matrix should be re-checked by the personnel listed in No. 5 above.

8. While a committee may recommend the nature of the information to be collected:

   a) a senior administrator should be in a position to make final decisions regarding inclusion of information and appropriateness of definitions.

   b) one person must be responsible for co-ordinating the compilation of the matrix. The difficulties imposed by variations in programs (and hence definition of terms) and data availability among campuses, makes this a requirement.

Program Matrix - General Footnotes

1. B.C. Post-Secondary Discipline Classification by Programs and Discipline (Clusters, Groups, and Detail) as per Vancouver Community College interpretation of: B.C. Ministry of Education Joint Educational Management Projects, Budget Allocation & Financial Information Project, "British Columbia Post-Secondary Financial Information Classification Manual". Technical Report No. 1 [Field Test Edition (Advance Publication Copy): October 16, 1978], Table 2, pp. A-4 to A-25.

   Interpretation available for Langara and King Edward Campus only.

2. Funding in annual Operating Budget of Vancouver Community College.

3. Funded outside annual Operating Budget of Vancouver Community College.

4. Intake occurs on specified dates only.

5. Intake occurs as space becomes available in specific programs.

6. The definition of a full and part-time student is not consistent among College campuses:

King Edward	- a full-time student enrolled in Vocational and English Language Training has 30 contact hours per week of instruction, a part-time student something less; in College Foundations a full-time student enrols in four or more courses, a part-time student something less.
Langara	- a full-time student enrolls in four or more courses, a part-time student something less.

Vancouver Vocational Institute - a full-time student has 30 contact hours per week of instruction, a part-time student something less.

Continuing Education - all students are considered part-time.

7. A group of individual courses for which the College awards a certificate or diploma.

8. Courses listed under the same general heading or pertaining to the same "discipline".

9. Successful completion of course - generally Pass or better, or Satisfactory. Excludes F Failure, I Incomplete, or W Withdrawal.

( ) Parenthesis means that information relates to a time period other than September 1977 through August, 1978.

KING EDWARD

a Figure can only be obtained by prolonged manual search

b Four months taken as fourteen weeks. Twenty months taken as seven weeks. These durations apply only to the College Foundations.

Footnotes:

a Data on Subject Areas registrants courses from two sources which are not entirely comparable

1) The non underlined figures on initial registrants comes from the computer print out "Statistics Registrations/Sections/Faculty".

2) The underlined figures on initial registrants and completions come from the computer print outs, "Distribution of Letter Grades by Subject Area and Locations".

b Full-time initial registrants only - no record of part-time.

c From U.B.C. into Appraisal Three - acceptance with partial credit.

d Based on 2 intakes; with 3 intakes in 1978, the value was 43.

e Intake for program averaged over two years (77-1 to 78-3) because of irregular intake i.e., a class each September and every other January. The 77-1 class was so small so a normal average probably will be 36 to 37 initial program entry averaged over a 2 year period.

f Probably low because of small 77-1 entry.

g The Business Administration Department also services University transfer, general interest, and other program students. These numbers are not reflected in the program matrix statistics.

U.B.C. transfers approximately 150 course registrants.

S.F.U. transfers approximately 40-50 course registrants.

B.C.I.T. transfers approximately 20 course registrants.

Pre accounting designation approximately 200 course registrants.

VANCOUVER VOCATIONAL INSTITUTE

Footnotes:

a Number of intakes per year applies to both A.M. and P.M. However, both A.M. and P.M. intakes occur on the same date. For example, Bookkeeping starts on 12 separate dates during the year but each of these dates has an A.M. and P.M. intake.

b Special form of continuous entry - insert intake. When a place becomes open the place will be given to someone who has the pre-requisites for the course. The individual usually comes from industry.

c Part-time information is not readily available.

d Still in class. Data on completion for V.V.I. data only applies to those who started the program from September, 1977 through August, 1978.

TABLE 5B VANCOUVER COMMUNITY COLLEGE: REGISTRANTS (HEADCOUNT) BY PROGRAM BY AGE

Source: B.C. Provincial Government Statistical Report Forms (October 31st statistics)

Notes:

* Withdrawals are not included for Vocational and Continuing Education programs.
* Withdrawals are included for Academic, College Foundations, English Language Training and Career/Technical programs.
* Vancouver School of Art, Continuing Education and English Language Training registrants are not recorded.
* 1976 is the single year in which all Vocational enrolment was reported by age: 1975, 1977, and 1978 shows Vocational enrolment at King Edward and Langara.
* Headcounts include both first and second year students.
* English Language Training was not reported by age in 1976, so all years have been excluded for comparability.
* The definition of a full and part-time student is not consistent amonge College campuses:

V.V.I.:	a full-time student has 30 contact hours per week of instruction; a part-time student something less.
K.E.C.:	a full-time student enrolled in Vocational and English Language Training has 30 contact hours per week of instruction; a part-time student something less.
	In College Foundations, a full-time student enrols in four or more courses; a part-time student something less.
Langara:	a full-time student enrols in four or more courses; a part-time student something less.
C.E.:	all students are considered part-time.

TABLE 6B. VANCOUVER COMMUNITY COLLEGE: REGISTRANTS (HEADCOUNT) BY PROGRAM BY SEX

Source: B.C. Provincial Government Statistical Report Forms (October 31st statistics)

Notes:

* Withdrawals are not included for Vocational and Continuing Education programs.
* Withdrawals are included for Academic, College Foundations, English Language Training and Career/Technical programs.
* Vancouver School of Art, Continuing Education, and English Language Training registrants are not recorded.
* 1976 is the single year in which all Vocational enrolment was reported by sex; 1975, 1977, and 1978 shows Vocational enrolment at King Edward and Langara.
* Headcounts include both first and second year students.
* English Language Training was not reported by sex in 1976, so all years have been excluded for comparability.
* The definition of a full and part-time student is not consistent among College campuses:

V.V.I.:	a full-time student has 30 contact hours per week of instruction; a part-time student something less.
K.E.C.:	a full-time student enrolled in Vocational and English Language Training has 30 contact hours per week of instruction; a part-time student something less.
	In College Foundations, a full-time student enrols in four or more courses; a part-time student something less.
Langara:	a full-time student enrols in four or more courses; a part-time student something less.
C.E.:	all students are considered part-time.

Vancouver Community College
Participation Rates and Enrolment
Projections to 1981 and 1986".

Appendix 3

"Calculation of the 1976 and 1978 Vancouver Community College Participation Rates and Enrolment Projections to 1981 and 1986".

Participation Rate Calculations

The equations used to calculate the Regional, Sub-Regional, and Program participation rates were selected after consideration of those used by the B.C. Post-Secondary Education Enrolment Forecasting Committee (B.C.F.C.). Each of the equations was checked against Vancouver Community College enrolment data for 1976 and 1978 to ensure that a high percentage of Vancouver Community College students were actually represented by the age groups used in the denominator of the B.C.F.C. equation. Where a difference between the B.C.F.C. age groups and the actual Vancouver Community College enrolment data was found, the ages indicated by the enrolment data were used to derive the denominator. The footnotes which accompany each of the Regional, Sub-Regional and Program participation rate calculations record the percentage of Vancouver Community College students who are represented by the age groups used in the denominator.

A major change has been made to the B.C.F.C. "Direct Entry" equation used in the Academic and Career/Technical participation rates. The number of Grade XII 'graduates' is used in this Report rather than the number of Grade XII 'enrollees' used by B.C.F.C., as this data better reflects the actual number of Direct Entry students from which Vancouver Community College may draw enrolment. This was determined after a thorough review of School Board data which indicates that there is a significant number of September Grade XII enrollees who do not graduate in the following Spring term.

Another important difference between B.C.F.C.'s calculation of participation rates and the calculations undertaken in this Report is the spatial aspect of Vancouver Community College's enrolment. As discussed in Section B5 of the Report, Vancouver Community College's catchment area extends beyond the City of Vancouver, which is the defined "College Region", as the College draws students from throughout the Greater Vancouver Region. Thus, the participation rates in this Report have been calculated to reflect the actual extent of Vancouver Community College's catchment area. All of B.C.F.C.'s participation rates are based exclusively on data from the City of Vancouver. The 1978 Student Survey data was used to ascertain the College catchment area and it has been assumed throughout the participation rate exercise, that the origin of Vancouver Community College enrolment has remained constant between 1976 and 1978, as comparable data on the origin of Vancouver Community College students is not available for 1976.

Further, a participation rate has been calculated in this Report for the complete range of Vancouver Community College programs including Continuing Education and English Language Training. For a comparative list of B.C.F.C. program participation rate calculations see: B.C.F.C. Report #25, Trend Analysis of Enrolments and Participation Percentages, April, 1977, p. 187.

1. REGIONAL PARTICIPATION RATES

Year.	Equation	Data	Participation Rate (Percentage)
1976	Total V.C.C. enrolment / G.V.R.D. population 15 to 44	16,784 / 508,165	3.30
1978	Total V.C.C. enrolment / G.V.R.D. population 15 to 44	18,375 / 526,456	3.49

Notes:
1. An age breakdown for all V.C.C. students is not available for 1976. According to the 1978 Student Survey, 90.9% of V.C.C. students were aged 15 to 44.
2. The G.V.R.D. Region includes the City of Vancouver, University Endowment Lands, Burnaby, New Westminster, Richmond, Delta, White Rock, Surrey, North Vancouver City & District, West Vancouver, Port Moody, Port Coquitlam, Coquitlam, Lions Bay, Bowen Island, and Ioco-Buntzeno. This region is illustrated in Map 1, Section B5 of the Report.

2. SUB-REGIONAL PARTICIPATION RATES

Year	Equation	Data	Participate Rate (Percentage)
1976	77% of total V.C.C. enrolment / Vancouver population 15 to 44	12,924 / 189,995	6.80
	7% of total V.C.C. enrolment / Burnaby population 15 to 44	1,175 / 62,280	1.89
	5% of total V.C.C. enrolment / Richmond population 15 to 44	839 / 39,980	2.10
	11% of total V.C.C. enrolment / Remainder of Region population 15 to 44	1,846 / 215,910	.85
1978	77% of total V.C.C. enrolment / Vancouver population 15 to 44	14,149 / 192,393	7.35
	7% of total V.C.C. enrolment / Burnaby population 15 to 44	1,286 / 65,244	1.97
	5% of total V.C.C. enrolment / Richmond population 15 to 44	919 / 42,032	2.19
	11% of total V.C.C. enrolment / Remainder of Region population 15 to 44	2,021 / 226,787	.89

Notes: 1. According to the 1978 Student Survey, 77% of V.C.C.'s students live in Vancouver, 7% in Burnaby, 5% in Richmond, and 11% live throughout the remainder of the G.V.R.D. Region.

	19% of enrolment / Remainder of Region population 20 - 44	1,184 / 216,887	.55

Notes: 1. In 1976 and 1978, Continuing Education students were not recorded by age. According to the 1978 Student Survey, 79.84% of all Continuing Education students were aged 20 to 44.
2. According to the 1978 Student Survey, 73% of Continuing Education students live in Vancouver, 8% in Burnaby, and 19% live throughout the remainder of the G.V.R.D. Region.

Enrolment Projections

The Regional, Sub-Regional and Program enrolment projections were calculated by applying the 1978 Vancouver Community College participation rates to the appropriately aged population forecast for 1981 and 1986.

The Regional population projections by age groups used in this Report are based on data from the G.V.R.D. Planning Department's forecasts, using the MEDIUM/MEDIUM growth assumption. The G.V.R.D. Planning Department has recently completed a major population forecasting exercise, using a cohort survival forecasting model.[1] Nine population forecasts were derived resulting from high, medium, and low estimates of future birthrates and high, medium, and low estimates of net migration. The forecasts were made by five year intervals from a 1976 base year to the year 1991. For a complete discussion of the G.V.R.D. forecasts and the cohort survival model, See: Population and Housing Forecasts 1976-1991, G.V.R.D. Planning Department, February, 1978.

Municipal population projections by age groups have not been calculated by the G.V.R.D. Planning Department, and those projections done by the individual Municipal Planning Departments vary in methodology. Thus, Municipal projections by age cohorts were derived for this Report by assuming that Municipal age change from 1976 would be consistent with Regional age change, so that Municipal age change reflects those changes occurring in the Region as a whole.

---

1. The 'cohort survival' population forecasting model starts with base year populations for males and females by five year age groups. By applying estimated age specific mortality rates, fertility rates, and net migration for the forecast period, the base year population is 'aged' and an estimate made of the population surviving at the end of the forecast period. This population, together with new mortality, fertility and migration figures can be re-entered into the population model and estimates made for subsequent forecast periods as far into the future as required.

Once this assumption was reached, the total population growth forecast for each Municipality by the G.V.R.D. Planning Department was segmented into age groups. The total population forecast for each Municipality is discussed in Population, Household, Employment, and Labour Force Estimates, G.V.R.D. and Sub-Regions 1976-1991, Technical Memoranda #14, G.V.R.D. Planning Department, September, 1978. A medium growth rate for each Municipality was used in this Report by averaging the LOW GROWTH DISPERSED Settlement Pattern and the HIGH GROWTH CONCENTRATED Settlement Pattern projections.

The number of graduates used in the 'Direct Entry' projections were calculated from data in September Enrolment Projections 1978 to 1988, Educational Data Services, Ministry of Education, 1978. Also, School Board personnel were contacted in various School Districts to ascertain the reliability of this data.

It must be emphasized that the enrolment projections made in this Report for programs with small enrolments, should be used with caution. This is because the likelihood of incurring a large percentage error is much greater when smaller numbers are being projected.

It must also be pointed out that implicit in these projections is the assumption that there will not be any major changes in Vancouver Community College policy or physical capacity which will affect the entrance or attrition rates within the College. This point is more fully discussed in Section C2 of the Report.

APPENDIX 4:

"Tabulation of Survey Data"

TABULATION OF SURVEY DATA: 1978 STUDENT SURVEY

As stated by the College Principal, the work of the Market Research Task Force would include a description of:

> "... the nature of [the] student body currently served by [the] College; age, educational/work background, place of residence, educational/employment goal at time of admission ..."[1]

To this end, the Market Research Task Force prepared a comprehensive questionnaire to collect the required information. The questionnaire was pre-tested at each campus to ascertain student comprehension and verify the language and phrasing of the questions. One hundred and thirty students were pre-tested in English Language Training, Career/Technical, and Academic programs. Revisions were made subsequently to the questionnaire in light of pre-test results. In addition, a modern Chinese translation was prepared for students more confident in that language.

With the co-operation of Vancouver Community College personnel, questionnaires were distributed and administered to students by instructors during class time. In the final two weeks of October, 1978, each of the full and part-time students enrolled at Vancouver Community College was asked to complete the questionnaire.

Overall, 11,728 or 63.83% of College students completed and returned the questionnaire. The response rate from each of the three campuses and Continuing Education varied as follows:

---

1. A.S. Manera, Planning Process for Vancouver Community College, 1978.

King Edward	3,109 returns, or 69.49%
Langara	3,860 returns, or 73.86%
Vancouver Vocational Institute	1,451 returns, or 59.39%
Continuing Education	3,308 returns, or 53.08%

Throughout the preparation and administration of the questionnaire, members of the College community were kept informed of the activities by the Market Research Task Force. This process has engendered a high degree of involvement and interest on the part of Vancouver Community College staff and was a useful learning process for individual members of the Task Force. In consideration of the fact that such an elaborate Survey exercise is unlikely to be pursued again in the foreseeable future, Task Force members intended that a broad range of in-depth questions should be included in the 1978 Student Survey. The data generated would then be available to facilitate the work of individual departments within the College, to assist them to probe more deeply in their own future planning endeavours. In this sense, the efforts of the Task Force are on-going. As a consequence of the foregoing, this "Tabulation" will be published separately and distributed widely throughout the College community.

Initially, it was intended that a preliminary analysis of the Survey-generated data would be undertaken, but owing to staff and time constraints, it has been impossible to undertake even preliminary analysis.

However, Survey data has been organized and recorded in the tables which follow; tabulation of the frequency of response in Section 1, and cross-tabulation of selected responses in Section 2.

Tables are numbered according to the question number in the Survey itself. Copies of the questionnaire are included.

1978 STUDENT SURVEY

Footnotes re Open-Ended Questions (Questions 11, 12 and 13) and "OTHER" Category (Questions 10, 38 and 39).

Ten of the questions in the Survey were either open-ended or contained an element capable of open-ended response; that is to say, items which required or invited unstructured written response. The analysis of all responses to open-ended questions was foregone in favour of an 8%$^{+}_{-}$ random sample, which produced 983 surveys, (233 - King Edward, 132 - Vancouver Vocational Institute, 393 - Langara, and 235 - Continuing Education).

The sample was "in the order of 8%" rather than "precisely 8%", because it was drawn and the laborious process of manual analysis begun before returns were fully processed and a precise count established. For the record, the sample represented 8.38% of the total surveys completed, returned, and processed; 7.17% for King Edward, 9.09% for Vancouver Vocational Institute, 10.18% for Langara, and 7.10% for Continuing Education.

* "Frequency of Response" may be greater than the number of surveys in the sample, because Questions 11, 12 and 13 encourage more than one response.
* Total of "% of sample" may exceed 100% for the same reason.
* "Frequency of Response" may be less than the number of surveys in the sample, owing to the volume of non-responses.
* Miscellaneous responses are lumped together and include those response frequencies in the order of 10 or less, with a high mean response frequency of 3.2% and a low mean response frequency of 1.0%.

STUDENT SURVEY

Dear Respondent,

The purpose of this survey is to provide information which will increase our understanding of the students we currently serve at Vancouver Community College. Such an understanding is important to us in the planning and development of new programs and facilities at the College.

Your replies will be used for statistical purposes only and will be kept strictly confidential. Please do not put your name or student number on this survey.

Thank you for your help!

Yours sincerely,

A.S. Manera,
College Principal

ASM/11

STUDENT SURVEY

INSTRUCTIONS:
Most of the questions here can be answered with a mark in a box ☒ beside the phrase which suits you best. Occasionally you will be asked to write out an answer. You will probably not have to answer all the questions but will be able to leave some out, as directed.

Read the whole question first before answering it. If you do not understand a question, ask your instructor.

STUDENT SURVEY

Dear Respondent,

The purpose of this survey is to provide information which will increase our understanding of the students we currently serve at Vancouver Community College. Such an understanding is important to us in the planning and development of new programs and facilities at the College.

Your replies will be used for statistical purposes only and will be kept strictly confidential. Please do not put your name or student number on this survey.

Thank you for your help!

Yours sincerely,

A.S. Manera,
College Principal
